SUMMARY

I have completed my BCA at Dayananda Sagar University, where I developed a strong passion for Data Analytics and Web Development. My commitment to continuous learning is reflected in my proficiency with a diverse set of tools and languages, including Python, Power BI, Excel, and Figma, along with foundational knowledge of HTML and CSS. My academic journey is enriched by hands-on experience through various projects that demonstrate my ability to apply these skills effectively.

EDUCATION

Academic	Year of Passing	% Obtained / CGPA
Bachelor of Computer Applications (BCA) Dayananda Sagar University, Bengaluru	May 2025	8.59
Pre-University (12th - PUC) (Course: SCBA - Statistics, Computer Science, Business Studies, Accountancy) SSMRV PU College, Bengaluru	May 2022	89%
S.S.L.C (10th – Matriculation) Shantiniketan Trust School, Bengaluru	August 2020	66.56%

SKILLS

With a foundational understanding of Python, I bring to the table a suite of technical abilities including data analytics with Power BI, advanced data management through Excel, design innovation via Figma, and web development skills with HTML & CSS, all supported by practical knowledge of SQL for effective database management.

INTERNSHIP EXPERIENCE

Company: Ioncure Tech Pvt. Ltd (July - August 2024)

- **Data Management and Digital Outreach Intern**
- Participated in a comprehensive data collection and web scraping project focused on state-wise news channels, newspapers, and online news portals. The initiative aimed to compile a detailed list of email IDs for the promotion of two major books—one showcasing the remarkable achievements of the honorable Prime Minister and the other exploring the AI revolution in India.
 - Collected and meticulously cleaned a dataset of approximately 30,000 email IDs from various states, utilizing Python for web scraping and Excel for data cleaning. Ensured the accuracy and relevance of the dataset by removing duplicates and irrelevant entries.
 - Gained hands-on experience in writing bulk emails, creating blogs using AI chatbot tools, and distributing content across social media platforms. This experience significantly enhanced skills in data processing, automation, and digital marketing.

Company: PwC Switzerland Power BI Job Simulation on Forage (August 2024)

➤ **PowerBI Virtual Internship**

- Completed a job simulation where I strengthened my PowerBI skills to better understand clients and their data visualization needs.
- Demonstrated expertise in data visualization through the creation of Power BI dashboards that effectively conveyed KPIs, showcasing the ability to respond to client requests with well-designed solutions.
- Strong communication skills reflected in the concise and informative email communication with engagement partners, delivering valuable insights and actionable suggestions based on data analysis.
- Leveraged analytical problem-solving skills to examine HR data, particularly focusing on gender-related KPIs, and identified root causes for gender balance issues at the executive management level, highlighting a commitment to data-driven decision-making.

ACADEMIC PROJECTS

2025-2025: AI Code Fusion

- Developed a web-based tool using python, flask, and Gemini 2.0 flash API, enabling AI-powered code review and conversion across languages like python, java, C++, C and JavaScript.
- Implemented a user-friendly interface with real-time syntax highlighting and file upload features, achieving a 10-20 second response time.

2024-2024: AI Voice Assistant

- Developed a voice assistant with Python as the backend and utilizing HTML, CSS, and JavaScript for the frontend to design interactive animations, buttons, and the user interface.
- The voice assistant is capable of executing tasks such as opening applications through voice commands, providing responses to user queries similar to ChatGPT, and initiating phone calls via WhatsApp.

2023-2024: Game of Chess

- Developed an interactive chess game using Python with libraries such as Pygame and SimpleGUI.
- Implemented AI algorithms allowing users to engage in gameplay against computer opponents.

2022-2023: E-commerce Website (Shadow Shopping)

- Designed and basic functional e-commerce platform, inspired by Amazon and eBay, using HTML and CSS.
- We can see different section like male, female, shoes, electronics, beauty and others, which can be navigated from home page.

ACCOMPLISHMENTS THROUGH SELF-LEARNING

- Developed an interactive dashboard to visualize datasets sourced from Kaggle.
- Utilized Power BI and Excel to create dynamic visualizations and data manipulation.
- Demonstrated proficiency in data cleaning by addressing blank values and rectifying data types.
- Have basic understanding with Python and libraries such as NumPy, Pandas, Matplotlib, and Seaborn.
- Have an understanding with SQL and perform some operation in using MySQL Workbench
